

## **Burners for gas ZIO 240, ZIO 270, ZIO 320**

- // Gas burner for open fired systems
- // Compact burner housing
- // Simple design
- // Different nozzles and burner quarls
- // Reliable and robust swirl plate

### Applications

Thermal oxidizer  
Hot air generator  
Reheating furnaces  
Melting furnaces  
Forging furnaces  
Ladle preheating and drying stations

### Technical features

Control range 1:20 or higher with natural gas.  
Natural gas, LPG, gases with low cv.  
Also for preheated combustion air.  
Low emissions.  
Safe and reliable operation also on changing pressure in the combustion chamber.  
Ignition by direct spark or with pilot.  
Flame supervision by single electrode, redundant flame rod, separate flame rod or UV-cell.  
Capacity:  
ZIO 240: 1500 kW  
ZIO 270: 3000 kW  
ZIO 320: 5000 kW.
